

# Business Travel Payments and Data

**Start Date: May 16, 2019 2:00 PM**

**End Date: May 16, 2019 3:00 PM**

Business Travel Payments & Data Security: Protecting Data & Mitigating Risk in the Digital Age

Thursday, May 16th

2:00pm ET | 60 minutes

[Click here for other time zones](#)

Every year data breaches expose billions of records worldwide. Travel programs can be particularly vulnerable given a combination of factors including the multitude of vendors financial transactions take place with, the key service providers who may store personal or financial data and the traveling employees themselves using unencrypted public WiFi throughout their business trips.

At the end of the session, participants should be able to:

What travel managers are concerned about with regard to business travel payment data

What companies are currently doing when a data breach or fraud occurs

How can forms of payment mitigate risk of fraud and data breach

What controls are available and used by companies to keep their data secured

Presenters:
